

Pratik Ansetwar

QA Lead — Payments, Cards & Checkout | Mastercard & Amex | ISO 8583

Phoenix, AZ | (312) 647-0579 | pratik.ansetwar@gmail.com

Work Authorization: H-1B (I-140 approved) — transfer not subject to lottery; eligible for extensions beyond 6 years

PROFESSIONAL SUMMARY

QA Lead with 15+ years in fintech and ecommerce, specializing in end-to-end, SIT, and UAT testing for cards, payments, and checkout systems. Deep domain expertise across the Mastercard and American Express ecosystems, ISO 8583 validation, and modern checkout, mobile super-app, and crypto payment flows. Strong record of owning test strategy, driving release readiness, and reducing production defects. Hands-on with Playwright and Appium automation across API, UI, and mobile layers — writing and maintaining tests, and debugging and triaging failures within CI/CD pipelines.

SELECTED HIGHLIGHTS

- Reduced production defects by **~25%** at Bolt through risk-based test design, root-cause analysis, and proactive defect triage across checkout and payments.
- Led QA for Mastercard ISO 8583 ecosystems across acquiring, switching, and issuing — including hands-on validation with FINSIM, VTS, and MAS simulators.
- Owned quality for crypto buy/sell and investment flows integrated via Zerohash and Atomic Invest within a consumer-facing fintech app.
- Improved release efficiency by **~20%** on Amex programs through structured test planning, optimized cycles, and multi-vendor coordination.

PROFESSIONAL EXPERIENCE

Senior Software Engineer in Test (QA Lead) — Bolt Financial Inc.

Apr 2022 – Present

United States · Hybrid

- Lead end-to-end quality for checkout and payments across managed/embedded checkout, subscriptions, alternate payment methods, and merchant/admin platforms.
- Own SIT and UAT cycles for business-critical transaction flows, ensuring release readiness and stability across customer payment and conversion paths.
- Drive quality for the mobile super-app (iOS/Android), validating end-to-end journeys across checkout, payments, and account experiences.
- Validate card-network integrations including Mastercard SCOF and Click2Pay, ensuring compliance and reliability of transaction processing.
- Define and execute test strategy for payment service providers and alternate payment methods, applying risk-based and scenario-driven validation.
- Own quality for crypto buy/sell and investment flows integrated via Zerohash and Atomic Invest, ensuring transaction accuracy and seamless UX.
- Write and maintain automated tests across Playwright and Appium (API, UI, mobile); debug and triage test failures within CI/CD pipelines, diagnosing root causes and fixing tests as needed.

Senior Associate, Projects (QA Lead — Mastercard & Amex) — Cognizant

May 2016 – Apr 2022

United States · On-site

MASTERCARD — CARD NETWORK QA LEAD

- Led QA across Mastercard acquiring, switching, and issuing systems, with deep involvement in ISO 8583 message validation and full transaction-lifecycle testing.
- Performed integration testing using industry-standard simulators (FINSIM, VTS, MAS) to validate end-to-end payment-processing accuracy and reliability.

- Conducted API and database validation using Postman, SoapUI, and MySQL to verify robustness of card-network integrations.

AMERICAN EXPRESS — QA ENGAGEMENT LEAD

- Provided QA leadership across Amex engagements, coordinating multi-vendor teams to ensure aligned delivery and high-quality releases.
- Improved release efficiency by ~20% through structured test planning, optimized cycles, and proactive defect management using HP ALM and Rally.
- Mentored global QA teams and partnered with stakeholders to track progress, manage risks, and deliver consistent quality outcomes.

EARLIER EXPERIENCE

Test Specialist — IBM · India · Feb 2015 – May 2016 — System and integration testing for banking and financial-services clients.

Senior Consultant — Oracle Financial Services · India · Jul 2012 – Dec 2014 — FLEXCUBE and SWIFT Payments; validated core-banking and payment-messaging flows (FCMH).

Project Engineer — Wipro · India · May 2010 – Jun 2012 — Functional, regression, and integration testing across core and private banking applications.

SKILLS

Core Testing	End-to-End, SIT, UAT, Functional, Integration, Regression
Domain	Payments, Checkout Systems, Card Networks (Mastercard, Amex), ISO 8583, Acquiring / Switching / Issuing, Crypto Payments, Core Banking, Retail Banking
Process & Leadership	Test Strategy, Release Management, Risk-Based Testing, SIT/UAT Ownership, Multi-Vendor Coordination, Mentoring, Agile, Hybrid Delivery
Mobile & Automation	Playwright (TypeScript), Appium (iOS/Android), Xcode Simulators, Android Studio / Emulators, Real-Device Testing, XCUITest
CI/CD	Solid understanding of CI/CD processes and tooling — GitHub, GitHub Actions, Jenkins, CircleCI, ArgoCD; pipeline-integrated test execution and failure triage
Tools & Platforms	Postman, SoapUI, JIRA, Devrev, Asana, TestRail, HP ALM, Rally, Datadog, Proxyman, Chrome DevTools
Simulators	FINSIM, VTS, MAS
Prior Experience	Selenium, RestAssured (earlier hands-on)
Data & Cloud	MySQL, PostgreSQL, AWS, Docker, Kubernetes

EDUCATION

Bachelor of Engineering, Electronics — Nagpur University
